

2

PASSING THE HR SCREENING PROCESS

Based on the standard Recruitment and Selection workflows of local companies, make sure you prepare the following:

The Food Industry Resume

Keep it to 1 page. Highlight laboratory skills, machine operations, thesis work related to food/science, or leadership in school projects.

Health and Medical Clearance

Because you will be around food products, effective HR teams require strict medical clearances (Stool exam, X-ray, Typhoid vaccination). Prepare these early to speed up your hiring.

Be Interview Ready

Study the company, understand the role, and practice answering common HR interview questions.

ABOUT THIS STUDENT GUIDE

Bridging the Gap: Corporate to Factory

Based on our research regarding HR effectiveness in Valenzuela's food manufacturing sector, we discovered exactly what local HR professionals look for in incoming talent.

This brochure is designed to help you, the student, by pass common application mistakes and successfully land an internship or full-time role.

1

THE COMPETENCIES HR LOOKS FOR

Our research shows that effective HR professionals prioritize candidates who already understand the fundamentals of the industry. To stand out, highlight these on your resume.

Food Safety Awareness

Show knowledge of GMP, sanitation, food safety standards, and HACCP basics

Adaptability & Shifting Readiness

Be open to flexible schedule, rotating shifts, and overtime when needed

Technical & Practical Skills

Lab techniques, equipment handling, quality checkin, and data recording.

Teamwork & Communication

Work well with others and follow instructions clearly

Work Ethic & Attitude

Be punctual, disciplined, and willing to learn

Your academic knowledge in the foundation; understanding HR expectations is the key to the door.
